

## The Cause of Menopause Mercury Is Not a Planet

By Toby L Murray Rmt

AUTHORHOUSE, United States, 2015. Paperback. Book Condition: New. 203 x 127 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.In this work Toby L. Murray RMT connects human anatomy and physiology to the Inverse Square Law and the Biological Tides Theory in support of the hypothesis that the Moon s gravity generates a Monthly Cranial Respiration Cycle in cerebral spinal fluid which induces the secretion of neuro-endocrine hormones thus regulating bodily functions such as menstruation. This hypothesis further proposes that as the Moon steadily moves further away from Earth in a process known as the Lunar-recession the Monthly Cranial Respiration Cycle diminishes leading to conditions such as menopause, disease, and aging in-general. The author combines the ideas of the late astronomers Drs. Thomas Van Flandern and Robert Harrington with Newtonian Mechanics and General Relativity to demonstrate that Mercury is the moon to the planet Venus which separated from Venus in a process similar to the Moon s recession from Earth. The resulting new models of the solar and planetary systems are that of atoms of eight life essential elements with properties belonging to the group of non-metals on the Periodic Table of Elements.

### Reviews

*This ebook can be worthy of a go through, and a lot better than other. Better then never, though i am quite late in start reading this one. Its been printed in an exceedingly easy way which is just soon after i finished reading this book where basically modified me, affect the way i really believe.*
