FBC LTD, 2017. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from Farm Income Situation: April 1963 Realized net farm income this year is likely to be almost as high as the 1962 estimate of billion, which was the highest level in 9 years. This reappraisal for 1963 takes into account (1) the recent price decline in cattle and hogs; (2) the lower payment rates on diverted feed grain acreage but higher support payments for feed grains than in 1962; and (3) a continued substantial rise in production costs. However, even with the likelihood of a small decline in aggregate net farm income in 1963, realized net income per farm will probably equal the record of 1962, as a result of the continuing decline in numbers of farms.
