

Vermont Medical Monthly Volume 17, No. 1

By Vermont State Medical Society

Rarebooksclub.com, United States, 2013. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1911 edition. Excerpt: . case of cobra-bite artificial respiration might prolong the interval of resistance offered by the victim s organism to the action of the poison. Further investigation showed that in rabbits a dose of poison which ordinarily proved fatal in 25 minutes required nine hours for the fatal effect when the animal had been treated by artificial respiration. He therefore recommended that artificial respiration should be employed immediately after a person had been bitten, and that antivenomous serum should be injected as soon as possible. The serum required an hour or two for the production of its effect, and the artificial respiration ought to be continued without interruption during the whole time.--Lancet, July 16, 1910. Lactic Acid Bacilli In Gonorrhoea.--Watson (British Medical Journal, 1910, No. IV) advocates the use of sour milk injection in gonorrhoea in woman. He has obtained excellent results in a number...
