For Census 2010, automation and information technology (IT) are expected to play a critical role. The Census Bureau plans to spend about 3 billion on automation and technology that are to improve the accuracy and efficiency of census collection, processing, and dissemination. From February 2006 through June 2009, the Bureau is holding a Dress Rehearsal during which it plans to conduct operational testing that includes decennial systems acquisitions. In October 2007, GAO reported on its review of four key 2010 Census IT acquisitions to (1) determine the status and plans, including schedule and cost, and (2) assess whether the Bureau is adequately managing associated risks. This testimony summarizes GAO's report on these key acquisitions and describes GAO's preliminary observations on the performance of handheld mobile computing devices used during the Dress Rehearsal. This item ships from La Vergne, TN. Paperback.
