

## Algebraic Curves

By Walker, Robert J.

Book Condition: New. Publisher/Verlag: Springer, Berlin | This book was written to furnish a starting point for the study of algebraic geometry. The topics presented and methods of presenting them were chosen with the following ideas in mind; to keep the treatment as elementary as possible, to introduce some of the recently developed algebraic methods of handling problems of algebraic geometry, to show how these methods are related to the older analytic and geometric methods, and to apply the general methods to specific geometric problems. These criteria led to a selection of topics from the theory of curves, centering around birational transformations and linear series. Experience in teaching the material showed the need of an introduction to the underlying algebra and projective geometry, so this is supplied in the first two chapters. The inclusion of this material makes the book almost entirely self-contained. Methods of presentation, proof of theorems, and problems, have been adapted from various sources. We should mention, in particular, Severi-Laffier, Vorlesungen über Algebraische Geometrie, van der Waerden, Algebraische Geometrie and Moderne Algebra, and lecture notes of S. Lefschetz and O. Zariski. We also wish to thank Mr. R. L. Beinert and Prof. G....

### Reviews

*This book is definitely worth buying. This really is for all who state there had not been a worthy of studying. You will not sense monotony at any moment of the time (that's what catalogs are for concerning should you check with me).*

-- **Mr. Martin Baumbach**

*A very great pdf with lucid and perfect explanations. It really is really interesting through reading time period. You won't really feel monotony at any moment of your own time (that's what catalogs are for about in the event you question me).*
