**Rapid multiplication of
cassava propagule**
As affected by plant density and poultry manure

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | As affected by plant density and poultry manure | Inadequate supply of improved cassava propagating materials is a major constraint in cassava production. Cassava has a low multiplication ratio (1:10). Low multiplication ratio of cassava can be overcome using rapid multiplication techniques, like tissue culture and minstem cuttings propagation though with a lot of limitations. The use of macro stems to overcome the problem of low multiplication ratio is a sure alternative

These kinds of ebook is almost everything and got me to seeking ahead of time plus more. It really is filled with wisdom and knowledge I discovered this book from my i and dad advised this publication to learn.

-- **Sonny Bergstrom**

Undoubtedly, this is the best function by any writer. This really is for those who statte there was not a really worth reading. Its been written in an exceptionally basic way which is merely right after i finished reading throug this book by which really transformed me, change the way i really believe.
