Excerpt: .sides of the chest for two seconds more. These acts are to be steadily repeated alternately, and the process of artificial respiration by this means continued until medical aid arrives. aintsinca, e When poisons have been taken, vomiting may be encouraged oipoiioning. ky tickling the throat, and by the administration of warm water with a little mustard added to it. BEDSORES. Nothing is a surer test that careful attention is given by the Attendants to the sick-nursing in an Asylum than the absence of bedsores in those Patients liable to them, and the successful management of such sores, when, in spite oi every precaution, they do unfortunately occur. The Patients most liable to bedsores are those known in Asylums as General Paralytics, those suffering from other forms of paralysis, and those that, confined to bed for a lengthened period, have become extremely feeble and...
