RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 94 pages. Original publisher: Reston, Va. : U. S. Geological Survey, 2007. OCLC Number: (OCoLC)137239039 Subject: Chemical laboratories -- Auditing. Excerpt: . . . to observe the laboratory operations first hand and to verify that recommendations made during the performance audit had been properly implemented as well as to making additional recommendations as appropriate. The on-site audit confirmed recommendations for analytical practices intended to improve the efficiency and reliability of test results have been implemented and are being monitored on an on-going basis to substantiate the effectiveness of the recommendations. The recent implementation of a blind testing program should provide the recommended ongoing, real time monitoring of laboratory performance. The second goal was to assist the IGL in the finalization of IGL standard operating procedures (SOPs) for every significant analytical procedure as part of developing a total quality management system. Because there was not sufficient time to perform a detailed analysis of each analytical process, much of the on-site report contains a summary of best practices. The recommendations and examples included in this report do not necessarily constitute current or future practices or procedures employed at the IGL. The USGS management and IGL staff is currently reviewing the recommendations and examples to decide whether they can be in whole or in part incorporated into current SOPs without adversely impacting the quality of results produced. The full report of the On-site Evaluation (Appendix B. 3) can be referenced for specific information. For the sake of brevity, only the principal topics that were addressed are listed below: Collection of Coal Samples Collection of Ash Samples Sample Preparation, Storage and Handling Preparation of coal samples for analysis Preparation of ash samples for analysis Quality Control Instrument maintenance...
