

Monographs on topics of modern mathematics, relevant to the elementary field

Filesize: 2.2 MB

Reviews

Absolutely essential go through ebook. It typically does not cost a lot of. I realized this publication from my i and dad encouraged this publication to discover.

(Mallie Ondricka)

MONOGRAPHS ON TOPICS OF MODERN MATHEMATICS, RELEVANT TO THE ELEMENTARY FIELD

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 104 pages. Dimensions: 9.7in. x 7.4in. x 0.2in. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1911 Excerpt: . . . by a-ft The system q thus defined is an example of the algebra of all real quantities, for, like the system of points on the axis of reals, it can be shown to satisfy all the nineteen postulates of sec. 37; the labor of verification is in this case, however, very considerable, especially in case of Dedekind's postulate. (a) Finally, we construct still another class, K , by taking as elements of K all possible couples of the form (a, ft) , where a and p are any elements of the class q --that is, any real quantities. Two such couples (a, ft) and $(, ft)$ are called equal when $a \equiv ft$. The sum and products of two couples are defined by the following formulas, in which a and ft denote any elements of the system of real quantities, q , and $a \cdot ft$ and $aX, 3$ have the meanings defined for that system: $(a, ft)(, ft)$, $(a, ft)OK ft) (-ft, aft$. Within the class K , the couples of the form $(a, 0)$, in which the second element is zero, form a subclass $(,)$, and within this subclass C a couple $(a, 0)$ is said to precede a couple $(, 0)$ if a precedes $$ in the system q . The complete system K thus constructed can be shown to satisfy all the twenty-seven postulates of sec. 30, and is, therefore, like the system of points in the plane, an example of...
