Condition: New. Publisher/Verlag: Springer Netherlands | Equity Research, Practice, and Policy in Science Education | Relishing the tasks of celebrating, challenging and progressing our understanding of equity and diversity in science education, this thematically structured book explores five key areas of relevant research that include policy, globalization and leadership. | This volume takes on the vital tasks of celebrating, challenging, and attempting to move forward our understanding of equity and diversity in science education. Organized thematically, the book explores five key areas of science education equity research: science education policy; globalization; context and culture; discourse, language and identity; and leadership and social networking.
