

Handbook of Specific Losses in Flow Systems

By Robert P Benedict

Springer, United States, 2012. Paperback. Book Condition: New. Softcover Reprint of the Original. 279 x 210 mm. Language: English . Brand New Book ***** Print on Demand *****. EVEN WHEN one is willing to estimate the various loss coefficients in a given system, it is not always an easy matter to determine the flow rate and/or the total pressure drop across the system. While there are gas dynamics books that contain Fanno tables which involve flow with losses, such tables are never specific; that is, the conventional tabulations are never given in terms of specific loss coefficients or specific total pressure ratios. The tables contained in this book are unique in this respect. The user can establish from these tables not only the various state point functions, but the total pressure losses as well. (The total pressure ratio is shown to be the only true indication of loss in a flow system.) Both compressible and constant-density solutions are presented. Tables for fluids of various ratios of specific heats are included. Use of these tables is not restricted to constant-area systems, nor does their use require iterative procedures. For compressible flows, tables of solutions for both the subsonic and supersonic...

Reviews

This publication will never be straightforward to get going on looking at but really fun to see. This can be for all those who state that there had not been a worth looking at. You won't really feel monotony at any moment of your own time (that's what catalogs are for about should you request me).
