Ripple is a new and innovative RTGS (Real Time Gross Settlement System, remittance and currency network that is created by the Ripple company. It can also be formally called Ripple Transaction Protocol otherwise known as RTXP or the Ripple Protocol. It is based on an open source protocol with a consensus ledger and a native currency that is known as XRP (ripples). It was originally released in 2012 and was sold as a platform to provide fast, secure and almost free for the global transactions no matter the size The core of the system centers on the shared public database or a ledger. The whole basis sees the consensus process being used to allow the payment, remittances and exchanges and this is done in a distributed process. This book will seek to cover the features of the XRP or Ripple platform. So, the reader will become knowledgeable on the topic and be able to know the main things about it.
