

Brain, Vision, Memory: Tales in the History of Neuroscience (Paperback)

By Charles G. Gross

MIT Press Ltd, United States, 1999. Paperback. Condition: New. Language: English . Brand New Book. In these engaging tales describing the growth of knowledge about the brain -- from the early Egyptians and Greeks to the Dark Ages and the Renaissance to the present time -- Gross attempts to answer the question of how the discipline of neuroscience evolved into its modern incarnation through the twists and turns of history. Charles G. Gross is an experimental neuroscientist who specializes in brain mechanisms in vision. He is also fascinated by the history of his field. In these tales describing the growth of knowledge about the brain from the early Egyptians and Greeks to the present time, he attempts to answer the question of how the discipline of neuroscience evolved into its modern incarnation through the twists and turns of history. The first essay tells the story of the visual cortex, from the first written mention of the brain by the Egyptians, to the philosophical and physiological studies by the Greeks, to the Dark Ages and the Renaissance, and finally, to the modern work of Hubel and Wiesel. The second essay focuses on Leonardo da Vinci's beautiful anatomical work on the...
