John Wiley Sons Inc, United States, 2001. Paperback. Condition: New. Language: English . Brand New Book. Mental health practitioners are becoming increasingly aware that they are encountering a very large number of men and women who are survivors of sexual and physical abuse. This volume identifies the essential elements necessary for a system to begin to integrate an understanding about trauma into its core service programs. The fundamental elements of a trauma-informed system are identified and the necessary supports for bringing about system change are highlighted. The basic philosophy of trauma-informed practice is then examined across several specific service components: assessment and screening, inpatient treatment, residential services, addictions programming, and case management. Modifications necessary to transform a current system into a trauma-informed system are discussed in great detail as well as the changing roles of consumers and providers. This is the 89th issue of the quarterly journal *New Directions for Mental Health Services*.
