What would happen if an illegal drug, discovered by accident, could open pathways that have never before been opened In the late 1960s, American young people began a flirtation with mind-altering drugs. Desperately evil drugs like LSD, then Angel Dust, and even heroin. America released a lot of demons in the Pandora-like 60s and some of them have never been placed back in the box. Heres the story of one such drug and what it does to four people who take it, unaware that they will be altered forever. Rick Howell, living in the shadow of two women who have the power to change reality, must risk his life to stop the genocidal exploits of a desperate lunatic who wants to acquire their powers. The discovery of a mind controlling drug opens a pathway to frightening mental abilities for Rachel Farrell, who can move backward and forward in time at will, while Donna Riske, Rachels best friend, can control the thoughts of others. The battle of Good versus evil spreads from a chemistry lab at the University of Illinois as desperate characters in search of power and wealth travel the globe pursuing the Time Shifting secret drug. Good destroys evil, but not before greed, maniacal mayhem and a perfect crime put to rest the mind controlling drug. ACID is a grand prize winner of the Books Without Publishers writing contest. Author Jeff Lovell Jeff Lovell is a native Chicagoan, with three degrees from the University of Illinois and an earned doctorate from Vanderbilt University.
