## THE BIOLOGY OF INSECTS

Pica Press, New York, 1977. Hardcover. Book Condition: NEW. 189 p., 99 illustrations, 7 tables. The author traces the various specialist adaptations of form and function in insects, always from the point of view of functional development and change, never as a catalogue. In the second half of this book he discusses the impact of insects on the rest of the biosphere, including their ecological importance, their interactions with man, and their economic significance. d/j rubbed, with minor edge wear.
