

Critical Evaluation of Alumino-silicate Systems

By Huahai Mao

VDM Verlag Dr. Müller E.K. Okt 2013, 2013. Taschenbuch. Book Condition: Neu. 220x150x5 mm. Neuware - Thermodynamic knowledge of alumino-silicate systems is useful in steel and ceramic industries and for understanding geochemical processes. In this work the CALPHAD approach is applied to the thermodynamic modelling and assessments of the CaO-Al₂O₃-SiO₂, MgO- Al₂O₃-SiO₂ and Y₂O₃-Al₂O₃-SiO₂ systems and their subsystems. The compound energy formalism is used for all the solution phases including mullite, YAM, spinel and halite. In particular, the ionic two sub- lattice model is applied to the liquid phase. Based on recent experimental investigations and theoretical studies a new species AlO₂-1 is introduced to model liquid Al₂O₃. Thus, the liquid model corresponding for a ternary Al₂O₃-SiO₂-M₂O_m system has the formula (Al+3,M+m)P (AlO₂-1,O-2, SiO₄- 4,SiO₂)Q, where M+m stands for Ca+2, Mg+2 or Y+3. This model overcomes the long-existing difficulty of suppressing the liquid miscibility gap in the ternary systems originating from the Al₂O₃-free side during the assessments. All the available phase diagram and thermochemical data are critically evaluated and finally a self-consistent thermodynamic dataset is achieved. 88 pp. Deutsch.

Reviews

These sorts of pdf is the greatest ebook offered. We have study and that i am sure that i will going to study once more once more in the future. Its been printed in an remarkably simple way and it is only after i finished reading through this pdf through which in fact transformed me, affect the way i believe.

-- **Mr. Dashawn Block MD**

If you need to adding benefit, a must buy book. It can be writter in straightforward words and phrases and never difficult to understand. I realized this ebook from my dad and i advised this ebook to learn.
