

The Amateur Mechanics Workshop A Treatise Containing Plain and Concise Directions for the Manipulation of Wood and Metals. Including Casting, Forging Brazing, Soldering, and Carpentry

Filesize: 8.18 MB

Reviews

It is one of my personal favorite pdfs. Of course, it really is a play, nevertheless an amazing and interesting literature. It is extremely difficult to leave it before concluding, once you begin to read the book.

(Nicholas Ratke)

THE AMATEUR MECHANICS WORKSHOP A TREATISE CONTAINING PLAIN AND CONCISE DIRECTIONS FOR THE MANIPULATION OF WOOD AND METALS. INCLUDING CASTING, FORGING BRAZING, SOLDERING, AND CARPENTRY

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 56 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1874 edition. Excerpt: . . . the angles at the point where they cut equal four right angles. Take the small triangle E C D. The angles at C and D are each 45 (half the right angles at the corners of the square), then if it is true that the three angles of a triangle are together equal to two right angles, the angle at E must be a right angle (for we have taken from the triangle the two angles C and D, each of 45, and together 90 or one right angle, and so the one left must be the other), and we might take in turn each of the four small triangles in the same way, and thus should find at the point E, four right angles, as stated. It will thus appear that it is easy in many cases to draw two lines at a desired angle by very simple means--namely, with the ordinary two-foot rule and compasses alone. If an angle of 60 is required, it is only necessary to make a triangle of three equal sides, which is readily constructed as follows: Draw a line A B, Fig 120, six (any number of) inches in length, open a pair of compasses to that width and with one point at A, describe with the other an arc (part of a circle) as shown. Do the same from the other end of the line, and it will be found that the second arc cuts the first,...
