Two planetary scientists set out to explore a small desert planet which orbits a Red Dwarf star in an as of yet uncharted region of the Milky Way Galaxy and find that it s not as dead of a world as they once believed. Buried under massive sand dunes that dot the planet from one side to the other, lay ancient alien artifacts that must be protected at all costs. Raine is a planetary geologist sent from Earth to map and study the small planet s topography. Together they find the giant dunes of sand that cover the planet are far from ordinary. Ancient alien artifacts lay beneath the surface and it s up to them to discover their purpose.
