

## Government Operations: Competitiveness of Federal Computer Procurements: T-Imtec-90-12

By -

BiblioGov. Paperback. Book Condition: New. This item is printed on demand. Paperback. 26 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. GAO discussed federal agencies use of competitive procedures in their automated data processing (ADP) procurements. GAO noted that: (1) factors affecting procurement competitiveness included improper review of alternatives, poorly defined requirements, improper bias, and poorly trained or inexperienced contracting staff; (2) agencies did not ensure adequate and appropriate competition in the less than fully competitive procurements; (3) the General Services Administration, which was responsible for overall oversight of federal ADP procurement, did not always adequately exercise that responsibility; (4) over 80 percent of 8 agencies mainframe computer procurements between 1986 and 1989 required compatibility with existing systems; (5) almost 60 percent of those procurements required compatibility with one vendor; and (6) in some cases, agencies had legitimate reasons for limiting competition. This item ships from La Vergne, TN. Paperback.
