# The Elements of High School Mathematics; Comprising Arithmetic, Practical Geometry, and Algebra

By John Bascom Hamilton

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1921 Excerpt: .144. Definitions. The surface of a flat page of paper is an illustration of a plane surface or simply a plane. Any plane figure which is formed by straight lines is said to be bounded by straight lines. Such figures are known as polygons. The polygons more commonly discussed are those of three and four sides. They are designated as follows: (a) A polygon with three sides is called a triangle. (b) A polygon of four sides is called a quadrilateral. 145. Definitions. A triangle with one right angle is called a right triangle. Triangle ABC is such a triangle. A triangle with no right angle is called an oblique triangle. Triangle r DEF is such a triangle. If a triangle has two of its sides equal it is called an isosceles triangle. A triangle which has its three sides all equal to each other is...
