Robert Smith, Provost, and of the Regents, of the University of Maryland The subject selected for the ground work of this essay has received but a small share of the regard of physiologists. Many of them have avoided it alto-gether; and the occasional attention which phylosophi cal ci1riosity has paid it, is too limited and partial to throw more than a dim and doubtful light upon. The path of inquiry. The state of somnolency appears in fact too deeply laid in nature s plan either to invite or encourage much effort at discovery. The prospect of success bears no proportion to the magnitude and com plexity of the obstacles which block up the road of re search. But it is the proper business of physical in quiry to encounter natural difficulties. The more simple information of the senses, is neither adequate to man s real wants, nor the just limit of his rational desires. Science would still have slumbered over con fusion; had impediment or difficulty, always repressed the industry of intellect.
