In these proceedings of the international conference held in Kyoto in memory of the late Professor K saku Yosida, twenty six invited speakers display in their many facets of functional analysis and its applications in the research tradition of Yosidas school. Many of the topics are related to linear and non-linear partial differential equations, including the Schrödinger equations, the Navier-Stokes equations and quasilinear hyperbolic equations. Several of the papers are survey articles, the others are original (unpublished) and refereed research articles. Also included is a full listing of the publications of K. Yosida. Recommended to students and research workers looking for a birds-eye view of current research activity in functional analysis and its applications. FROM THE CONTENTS: K. Ito: Semigroups in probability theory. - T. Kato: Abstract evolution equations, linear and quasilinear, revisited. - J. L.
