

Subtrochanteric Osteotomy for the Correction of Deformities Resulting from Hip Disease: Report of Cases (Classic Reprint) (Hardback)

By Joel Ernest Goldthwait

Forgotten Books, 2017. Hardback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from Subtrochanteric Osteotomy for the Correction of Deformities Resulting From Hip Disease: Report of Cases The following cases are reported in order to put on record a series of ten consecutive osteotomies of the femur performed in adults for the correction of the deformities resulting from hip dis ease, and also to call attention to certain conditions which have resulted from these deformities and which have been strikingly relieved by the operation. The cases are of interest partly because of the degree of the deformity which existed and the immediate results of the operation; also, because of the effect which these deformities have upon the general health and in producing symp toms in other parts of the body. The relief of such symptoms and the immediate improvement in the general condition have been most striking, while the improvement in the mental condition, partly due to this and partly due to correction of the unsightly deformity, has been equally gratifying. In all ten cases are reported. Of these eight were men and two were women. All were of an age and position in...
