BiblioGov. Paperback. Book Condition: New. This item is printed on demand. Paperback. 44 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. Pursuant to a congressional request, GAO reviewed whether the Environmental Protection Agency's (EPA) Office of Pollution Prevention and Toxics (OPPT) is effectively planning for and using information resources to: (1) identify and assess those chemicals that pose the greatest risk to human health and the environment; and (2) retrieve critical data on health and environmental risks. GAO found that: (1) OPPT has not completed a strategic information resources management (IRM) plan to support implementation of the Toxic Substances Control Act (TSCA); (2) OPPT divisions and branches have developed over 200 independent information systems and databases that cannot share data because they lack standard data definitions and formats; (3) OPPT scientists waste time and effort using many different systems and undertaking manual searches; (4) OPPT is scheduled to complete its IRM plan in early 1994; (5) the proposed OPPT IRM plan does not include an assessment of users' functional and information requirements or define an information system architecture; (6) OPPT systems will continue to be incompatible without an information system architecture; (7) TSCA provisions requiring EPA to meet users' information needs have not been implemented; (8) the only OPPT online database available to external users for assessing TSCA data lacks a complete index, has limited search capabilities, and does not provide online access to abstracts; (9) external users must wait days or weeks to receive hard-copy documents of most TSCA data; and (10) the effectiveness of OPPT efforts will be limited unless OPPT focuses on external users' needs. This item ships from La Vergne, TN. Paperback.
