An attempt is generally made to give it at least some faint idea of the phenomena which surround us, and to afford it an insight into the mysteries of Physical Science. And, certainly, the man who passes through life unobservant of Creation and its wonders, of the beauty of this visible world, is so much to be pitied, that we cannot but hail with satisfaction the slightest efforts to teach the young the usefulness of an observant eye. Numerous text-books of Physical Science have been prepared by competent writers to render this study pleasurable and easy; but generally they are restricted in their scope, and, from the necessity they are under of being comprehensive, are meagre in their particulars.
