CHINA S CYBERWARFARE CAPABILITY (PAPERBACK)

Nova Science Publishers Inc, United States, 2011. Paperback. Condition: New. UK ed.. Language: English . Brand New Book. The government of the People s Republic of China (PRC) is a decade into a sweeping military modernisation program that has fundamentally transformed its ability to fight high tech wars. The Chinese military, using increasingly networked forces capable of communicating across service arms and among all echelons of command, is pushing beyond its traditional missions focused on Taiwan and toward a more regional defence posture. This book presents a comprehensive open source assessment of China s capability to conduct computer network operations (CNO) both during peacetime and periods of conflict, and will hopefully serve as a useful reference to policymakers, China specialists, and information operations professionals.
