Forgotten Books, 2017. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from Origin of the Zinc and Lead Deposits of the Joplin Region: Missouri, Kansas, and Oklahoma The author Of the present report has been studying the zinc and lead deposits Of the Joplin region for the last 12 years, although his work has not lain continuously in that field. His knowledge Of these deposits is consequently both intimate and extensive. It is usual in presenting the results Of an investigation to publish with the conclusions all the facts upon which the conclusions rest. Mr. Siebenthal has not followed this plan. Having reached definite decisions on the question Of how the ores were deposited, he has deemed it best to put these decisions and the significant facts on which they are based in form for immediate publication. A full presentation Of his evidence will require an account Of the general geology Of the region, with detailed descriptions Of local tracts and individual mines. The preparation Of this descriptive material, which must necessarily include many maps and illustrations, will require considerable time and some additional field work. The data will be published as a volume supplementary to the present report. The lead and zinc deposits Of the Mississippi Valley are not only Of great economic importance, but have long been intensely interesting to students Of ore deposits. They constitute a conspicuous example Of the occurrence Of sulphide ores in a region where, so far as can be determined, plutonic or volcanic activities can have had no part in their genesis. Naturally the Joplin deposits have been much studied, and Mr. Siebenthal, on pages 39 - 41 Of the present bulletin, has summarized the views Of his predecessors, among whom have been some...
