

## Carbon Nanotubes - Conducting Polymers Nanocomposite Materials

By Valter Bavastrello

LAP Lambert Acad. Publ. Mai 2011, 2011. Taschenbuch. Book Condition: Neu. 220x152x15 mm. This item is printed on demand - Print on Demand Neuware - The rapid progress in the field of organic conducting materials has found possible applications for sensors and molecular electronics. Among them both conducting polymers and carbon nanotubes, specifically Single Walled Carbon Nanotubes and Multi Walled Carbon Nanotubes, are good candidates for these applications. Their associations can lead to the synthesis of materials called nanocomposites which resemble the whole physical and chemical properties of the starting ones. This book is therefore focused on the fabrication of nanocomposites materials, based on polyaniline derivatives and multi-walled carbon nanotubes, by means of standardized oxidative polymerization, and the subsequent characterizations by different techniques to assess the physical and chemical properties of the synthesised materials. 84 pp. Englisch.

### Reviews

*Completely one of the better pdf I have got possibly go through. I really could comprehend every little thing using this composed e ebook. It is extremely difficult to leave it before concluding, once you begin to read the book.*

-- **Torey Kreiger**

*This composed pdf is great. It usually will not cost too much. I am very easily can get a pleasure of reading a composed book.*

-- **Luis Klein**
