Chelsea Green Publishing Co, United States, 2017. Paperback. Condition: New. Language: English . Brand New Book. Exploring the links between GM foods, glyphosate, and gut health With chronic disorders among American children reaching epidemic levels, hundreds of thousands of parents are desperately seeking solutions to their children s declining health, often with little medical guidance from the experts. What s Making Our Children Sick? convincingly explains how agrochemical industrial production and genetic modification of foods is a culprit in this epidemic. Is it the only culprit? No. Most chronic health disorders have multiple causes and require careful disentanglement and complex treatments. But what if toxicants in our foods are a major culprit, one that, if corrected, could lead to tangible results and increased health? Using patient accounts of their clinical experiences and new medical insights about pathogenesis of chronic pediatric disorders--taking us into gut dysfunction and the microbiome, as well as the politics of food science--this book connects the dots to explain our kids ailing health. What s Making Our Children Sick? explores the frightening links between our efforts to create higher-yield, cost-efficient foods and an explosion of childhood morbidity, but it also offers hope and a path to effecting change. The predicament we now face is simple. Agroindustrial innovation in a previous era hoped to prevent the ecosystem disaster of DDT predicted in Rachel Carson s seminal book in 1962, Silent Spring. However, this industrial agriculture movement has created a worse disaster: a toxic environment and, consequently, a toxic food supply. Pesticide use is at an all-time high, despite the fact that biotechnologies aimed to reduce the need for them in the first place. Today these chemicals find their way into our livestock and food crop industries and ultimately onto our plates. Many of these pesticides are the modern...
