This pdf will be worth buying. Better than never, though I am quite late in starting to read this one. I can easily get a enjoyment of reading through a published book.

Springer. Paperback. Condition: New. 706 pages. Dimensions: 9.6in. x 6.7in. x 1.6in. Particle physics seems to be entering a new period of consolidation. In 1977 when the first summer institute on particles and fields was held at the Banff Center, the standard model of the electro-weak interaction was a promising model more or less confirmed; today it seems quite well-confirmed. QCD was considered as probably the correct theory of strong interactions; today most theorists take it for granted. What seems to be lacking are computational tools and strenuous experimental testing; the major ideas seem to exist. Thus, this is a particularly auspicious time for a review of the status of theoretical and experimental particle physics and field theory. The lectures collected in this volume were presented from August 16 to August 27, 1981 at the Banff Center in Banff, Canada. The unifying theme was gauge fields and the topics covered dealt with electro-weak interactions, Q. C. D., sub-quarks and unified theories. The format of the Institute was as follows: thirteen lecture series of two to four hours each given by S. Brodsky, D. Bryman, M. Chen, S. Coleman, M. Creutz, H. Harari, J. Iliopoulos, C. H. Llewellyn Smith, P. Lepage, D. Perkins and L. Susskind. In addition there were nine seminars (one hour each) given by G. Bodwin, G. Bunce, M. This item ships from multiple locations. Your book may arrive from Roseburg, OR, La Vergne, TN. Paperback.
