Excerpt from **Sociological Construction Lines: A Dissertation, Submitted to the Faculties of the Graduate Schools of Arts, Literature, and Science in Candidacy for the Degree of Doctor of Philosophy (Department of Sociology)** It is not the popular mind alone that is in uncertainty as to what sociology is. Even to the scientist devoted to the subject the name stands for a problem rather than for an achieved solution. The problem is, moreover, so involved, and it presents so many phases and reduces itself into so many subsidiary problems, that each sociologist addresses himself to a different phase of the whole, a different set of subsidiary problems involved in the total solution; and, as a rule, each is inclined to describe the study of sociology as being just the particular kind of work in which he is absorbed. An extreme illustration of this is the remark of a German scholar, already famous for contributions to the subject which he has embodied in lectures and articles. This man, on being asked what he regarded as the most important sociological books in the German language, answered: There are no books in the German language on sociology as I conceive it. One who surveys the various and contrasting beginnings that have thus far been made is ready to appreciate the words with which Professor Fairbanks begins his Introduction to Sociology. Sociology is the name applied to a rather inchoate mass of materials which embodies our knowledge about society. That this mass of materials includes much that is of great practical importance, and that in connection with it there have been developed already some broadening and illuminating points of view, is beyond question. But these points...
