By Professor Nadia Bozak

Rutgers University Press. Paperback. Condition: New. 256 pages. Dimensions: 9.0in. x 6.1in. x 0.9in. Film is often used to represent the natural landscape and, increasingly, to communicate environmentalist messages. Yet behind even today's green movies are ecologically unsustainable production, distribution, and consumption processes. Noting how seemingly immaterial moving images are supported by highly durable resource-dependent infrastructures, *The Cinematic Footprint* traces the history of how the hydrocarbon imagination has been central to the development of film as a medium. Nadia Bozak's innovative fusion of film studies and environmental studies makes provocative connections between the disappearance of material resources and the emergence of digital media with examples ranging from early cinema to Dziga Vertov's prescient eye, from Chris Marker's analog experiments to the digital work of Agnès Varda, James Benning, and Zacharias Kunuk. Combining an analysis of cinema technology with a sensitive consideration of film aesthetics, *The Cinematic Footprint* offers a new perspective on moving images and the natural resources that sustain them. This item ships from multiple locations. Your book may arrive from Roseburg, OR, La Vergne, TN. Paperback.

Reviews

A must buy book if you need to adding benefit. This really is for all those who statte that there had not been a really worth looking at. Your daily life period will likely be change when you complete reading this publication.

-- **Veronica Hauck DVM**

The most effective publication i at any time read. We have study and i am sure that i will likely to read yet again once again in the foreseeable future. You will not truly feel monotony at anytime of your time (that's what catalogs are for about in the event you request me).
