## LIFE SCIENCES FOR THE NON-SCIENTIST (2ND REVISED EDITION)

Imperial College Press. Paperback. Condition: new. BRAND NEW, Life Sciences for the Non-Scientist (2nd Revised edition), Viqar Zaman, As diverse as they are interesting, the issues within the life sciences never fail to impress and stir controversy among the lay public. In a field that too often presents the general reader with challenging and confusing material, this book provides a breath of fresh air: a readable, standalone collection of essays that navigate the complex terrain of cells, cloning, and Mad Cows. The second edition of this popular book is thoroughly updated with the latest issues, information, and statistics in the same readable and vividly illustrated format. A new chapter on organ transplantation looks at advances in immunology and the discovery of immunosuppressive drugs, which have contributed significantly to the success rate of these surgeries. Another new section tackles the fascinating subject of heredity, considering its historical background and Mendel's discoveries, genetically determined diseases, and the importance of genetic counseling. Illustrating how art, philosophy and mythology juxtapose yet complement scientific thought and evolution, the inclusion of poems and quotes at the end of each chapter serve to make this book truly unique.
