Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1913 edition. Excerpt: .has been replanked twice and some of the underplank renewed. The operation of the boilers was discontinued from May 14 to October 15, and during this time the plant has been thoroughly overhauled and the boilers inspected by the State Inspector. The concrete masonry bearing of the lower set of gates of the small boat-lock cracked away from the main walls and became unsafe. It has been removed and replaced by new reinforced concrete. This work required the placing of the stop-plank and the pumping out of the lock during its progress. The interiors of all sluices were pumped out for inspection, and, excepting some cracks in the bottom and side-wall masonry. due to settlements, were generally in good condition. The Boston and Cambridge marginal conduits have been inspected and found in good condition, and both have been flushed twice during the year. All the...
