Reviews

Unquestionably, this is actually the very best work by any article writer. It usually does not price a lot of. Once you begin to read the book, it is extremely difficult to leave it before concluding.

(Augustine Pfannerstill)

ENVIRONMENTAL CONTAMINATION: CORPS NEEDS TO REASSESS ITS DETERMINATIONS THAT MANY FORMER DEFENSE SITES DO NOT NEED CLEANUP: GAO-02-658

Bibliogov, United States, 2013. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.The Department of Defense (DOD) estimates that cleaning up contamination and hazards at thousands of properties that it formerly owned or controlled will take more than 70 years and cost as much as \$20 billion. These formerly used defense sites (FUDS), which can range in size from less than an acre to many thousands of acres, are now used for parks, farms, schools, and homes. Hazards at these properties include unsafe buildings, toxic and radioactive wastes, containerized hazardous wastes, and ordnance and explosive wastes. The U.S. Army Corps of Engineers is responsible for identifying, investigating, and cleaning up hazards resulting from military use. GAO found that the Corps lacks a sound basis for its conclusion that 38 percent of 3,840 FUDS need no further study or cleanup action. The Corps determinations are questionable because there is no evidence that it reviewed or obtained information that would allow it to identify all the potential hazards at the properties, or that it took sufficient steps to assess the presence of potential hazards. GAO also found that the Corps often did not notify owners of its determinations that the properties did not need further action, as called for in its guidance, or tell the owners to contact the Corps if evidence of DOD-caused hazards was found later.
