### **Reviews**

*A very amazing publication with perfect and lucid information. We have read through and that i am certain that i will planning to study once more yet again in the future. You will not really feel monotony at anytime of the time (that's what catalogues are for about should you question me).*

DOWNLOAD

Artech House Publishers, United States, 2015. Mixed media product. Condition: New. Language: English . Brand New Book. This authoritative new resource presents fundamentals of radar analysis including the range equation, detection theory, ambiguity functions, antennas, receivers, SP, and chaff analysis for modern radars. This book addresses details behind the detection probability equations and origins radar engineers commonly use to perform signal processor analyses. This book consolidates discussions of receiver design and analysis and treats areas of digital receivers not commonly found in other books. Packed with details on how to perform radar range equation and detection analyses, RCS modeling, ambiguity function generation and antenna pattern generation. This book also includes detailed analyses of coherent and non-coherent integration, design and analysis of analog and digital receivers, stretch processor implementation and SAR signal processor implementation. This resource also covers Basic STAP implementation and analysis as well as SLC design and implementation. This book is accompanied by a MATLAB on CD. This new resource is intended as a text for a series of courses in radar and as a theory and practice reference for practicing radar engineers.
