

Modern Petrochemicals

By Prof Ali El-Shekeil

Createspace, United States, 2013. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Modern Petrochemicals Ali El-Shekeil, Professor of Chemistry, Sana a University, Yemen The modern petrochemical industry is a universal key industry. Petroleum supplied a great starting material that is characterized by cheap price, availability in huge quantities, ease of transport, diversity of products and uses besides the production of many feedstocks for the petrochemical industries. The petrochemical products reached all the applications of the modern citizen to the extent that it seems impossible to imagine living without them. They dominated all aspects of civilized life including building and structure, transportation, textiles and clothing, food, agriculture, industry and the everyday use. They introduced excellent alternatives to some natural materials such as cotton, wool and natural rubber, in massive quantities with extremely low prices and superior specifications. This book is designed to study the chemistry and technology of the primary petrochemicals: ethylene, propylene, butadiene and butenes, benzene, toluene and xylenes, together with methanol. These are the main bricks in the petrochemical industry from which hundreds of intermediate petrochemicals are made. The intermediate petrochemicals can be reacted to give the performance or...
