S. House of Representatives, Ninety-Sixth Congress, First Session, September 5 and 6, 1979** I would like to emphasize today the tremendous progress we have made in the past and how this technology has led to operating systems and how these systems have created a global business. Then I would like to address future potentials, particularly geostationary orbit plat forms, and last I intend to mention some development problems. I have just termed satellite communications a business. Today it truly is, with total revenues of over \$1 billion a year, employing thou sands, in fact, tens of thousands of people and providing useful and profitable services to institutions and individuals.
