Excerpt: . hen this positive pump is installed, proper circulation in the radiator is assurcd--and no motor can overheat if the water circulates rapidly as it should. More Ford radiators freeze every year than those of cars of other makes. This is due to the fact that a Ford has no water pump and the circulation. being sluggish. the motor frequently overheats. This overheating causes the rapid evaporation of the non-freeze solution in the water and a frozen radiator is the result. The Circulator, by preventing overheating, prevents freezing. DEALERS: The Universal VWater Circulator fills the long-felt want for a reliable water pump for Fords--there has long been a universal demand for a product such as this. This demand, the low retail price and our liberal trade discounts make this a very attractive article for on to handle.
