*It becomes an awesome publication that I actually have actually read. It really is written in simple terms and not difficult to understand. Once you begin to read the book, it is extremely difficult to leave it before concluding.*

BookSurge Publishing. Paperback. Condition: New. 242 pages. Dimensions: 9.0in. x 6.0in. x 0.6in. This book details the design and implementation of Short Messaging Service (SMS) and MMS applications. The main aim of this book is to provide SMSMMS developers with the tools necessary to develop applications which can send SMSMMS messages to groups of mobile devices. 1. The first section of this book presents a Java SMS application which allows the storage of contacts and groups of contacts. Thus the user of the application can customise his/her own list of contact Individuals and Groups of contacts (Such as: Family, Friends, Work Colleagues etc). Upon selection of Individual(s) and/or Group(s) a single message such as how r u all can be sent to all their respective Mobile Stations (MS) by clicking on the Add and then Send button. The simplicity and ease of use of this application allows a diverse range of users from an individual home user to corporate wide user base. All code is presented and a working version is freely available for download. 2. The middle section of this book presents a similar group bulk SMS application which is web enabled. The application is written using Active Server Pages and is purely web based. Again, it allows the sending of messages to individuals and groups. For the purpose of sending SMS in each scenario, the Simplewire Active X Software Development Kit is used. All code is presented and a working version is freely available for download. 3. In order for rich media MMS messages to be sent and received, they must first be transcoded into the MMS format. Essentially what happens is that the content is tailored before it arrives at the mobile. This tailoring process is called transcoding. Transcoding systems can adapt video, images, audio and text to...
