Forgotten Books, 2017. Hardback. Condition: New. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*. Excerpt from Use of Power Driven Soil Resistance Recorder for Study of Compaction of Soils by Tractors In studying the data obtained with any type of unit that measures the soil condition by its resistance to penetration, a true measure of conditions is not indicated until a uniform layer of soil is encountered. Thus if the lug equipment compacts the soil behind the lugs, then breaks this area loose to form a compacted olod, the compactness of this olod is not measured. This could probably be done only by careful apparent specific gravity determination for these clods. The data obtained with the resistance recorder indicates the packing effects produced in the area below that loosened by the lug equipment. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.
