Forgotten Books, United States, 2016. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from Natural Philosophy, Vol. 2: Being a Hand-Book of Chemical Physics, or the Physics of Heat, Light and Electricity The design of the Author in preparing the following pages was to furnish the student with a brief yet comprehensive resume of all that is important in the departments of natural science of which it treats. He believes that the student of chemistry will find included all that is necessary or desirable as an introduction to that important branch of knowledge, without being so diffuse as to extend to several hundred pages. He has aimed throughout at being as clear and as concise as possible in his definitions, explanations, and statements; and, on that account, he feels confident that teachers who employ his little work as a text-book in their schools will find their pupils master the matter with much more ease than by the use of, it may be, an equally comprehensive but less condensed treatise. Whenever the nature of the subject has permitted the use of problems to illustrate and enforce particular principles, they have been introduced, so that the plan adopted in Part I. has been steadily kept in view in the preparation of the present book. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work.
