RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 46 pages. Original publisher: Washington, D. C. : U. S. Dept. of Commerce, National Telecommunications and Information Administration, 1979 OCLC Number: (OCoLC)709789206 Subject: Radio -- Transmitters and transmission -- Data processing -- Catalogs. Excerpt: . . . Item: 1-4 Title: SPHERE computes: The program computes the basic transmission loss over the earth for microwaves. Input: The required input parameters are station separation, station heights, and wavelength. Limitations: The program accounts for reflection, refraction, diffraction, but not tropospheric scatter or ionosphere refraction. It also assumes perfect conductivity. Current Status: The published version assumes a 4 3 earth; other earth factors can be obtained by scaling the distances and the wavelength. The in-house version has an input for earth factor. References: 1976 Microwave Engineers Handbook, Microwave Journal, 1976. The program evaluates the solution given by V. Fock, problems, 1965, Electromagnetic diffraction and propagation Chap. 12. J. For more information contact: Dr. Ira Gilbert or Dr. J. MA G. McCue, Lincoln Laboratory, MIT, Lexington, 02173. 9 This item ships from La Vergne,TN. Paperback.
