Forgotten Books, 2017. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from Fire-Bgc: A Mechanistic Ecological Process Model for Simulating Fire Succession on Coniferous Forest Landscapes of the Northern Rocky Mountains The second portion of this paper details the application of fire-b gc to a whitebark pine (pinus albicaulis) forest in the Bob Marshall Wilderness Complex (bmw C) of Montana. This simulation is referred to in this paper as the bmw C project. The objective was to investigate the consequences of management policies on the whitebark pine ecosystem dynamics in a spatial domain. Several management scenarios were simulated on a ha upper subalpine landscape in the southwestern part of the Swan Range of the bmw C to determine the response of whitebark pine to vari ous management actions. Many fire-bgc parameters presented in this paper were quantified specifically for this study area using field data collected by Keane and Morgan (1994) and Keane and others Ex amples of these parameters are provided throughout model documentation.
