

## Complete Graded Arithmetic Volume 8

By George Edward Atwood

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book \*\*\*\*\*\* Print on Demand \*\*\*\*\*. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1902 Excerpt: .numbers is equal to the ratio of two other numbers, one of which is to be found. To solve a problem by proportion, the pupil must first determine what two pairs of numbers in the problem have equal ratios. He then expresses the equality of these ratios in the form of a proportion, denoting the number to be found by x, and finds the missing term. Note.—It must be remembered that the terms of a ratio must be expressed in the same unit. At the same price, two quantities of anything have the same ratio as their respective cost. If 48 yards of silk cost \$ 84, how much will 25 yards cost at the same price per yard? 48: 25:: 84: x 1. If 5 yards of lace cost \$ 8.75, how many yards will cost \$ 28 at the same price per yard? 2....

## Reviews

This is an awesome publication which i have actually read. This is certainly for all who statte that there was not a well worth reading through. Its been designed in an extremely straightforward way and it is merely after i finished reading this ebook in which actually changed me, affect the way in my opinion.
