Createspace Independent Publishing Platform, 2016. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****.Humans are approaching a point of no return. The time of denial is over. Climate change is threatening all humans, all other species, and planet Earth. While media is focusing on political and religious bickering; terrorist- and nuclear threats, Brexit, Trumpism and populism, the Earth is suffering from man-made catastrophes. All people, all creatures and our wonderful, beautiful and life-giving planet are heading towards an apocalyptic end. How could things go so horribly wrong? 4300 years ago the Highpriestess Encheduana warned her contemporaries about the consequences when women began to be neglected, and the disasters and calamities that would be the result of it. In this sixth revised edition of **EVOLUTIONARY ideas - A short story about why, when and how humans (by all accounts) took the wrong path and almost killed the planet**, I highlight some of the many missteps that humanity chose and brought us to where we are today. But it is also a book about love; the amazing gift of evolution to humanity.
