Zheng gem translated Publisher: Electronic Industry Press Date :2012-7-1 ISBN: 9787121175701 Words: 544 thousand yards: 325 Edition: 1 Binding: Paperback: 16 Weight: Editor's Choice written by Yang signal with the system ( The MATLAB Version) covers signal processing, communication engineering, automatic control (automation) and other related disciplines most basic theory and mathematical analysis. The idea of ??this book is gradually formed with the practical application of changes in circumstances. The book cites many examples to help readers further understand the ideas and content of the book. The book also describes the use of MATLAB and Simulink for signal and system analysis and design software. which is consistent with the requirements of the ABET (Engineering Certification Committee) for the comprehensive utilization of computer tools. Summary Yang prepared Signals and Systems (MATLAB Version) systematic introduction to the basic concepts of a discrete-time signal analysis and processing, basic analysis methods and processing techniques. 8 book chapters, including Introduction to signals and systems, continuous-time Fourier analysis and discrete-time Fourier analysis, z transform, sampling and reconstruction of continuous-time systems with discrete-time systems, analog and digital filter design, system status spatial analysis. The book also describes the current international popular MATLAB simulation software and typical application examples. Britannica novel idea, the concept is clear, concise content and rigorous exposition, reflects the basic content in the areas of signal and system. Each chapter with exercises, appendix gives the detailed various conversion tables, commonly used mathematical formulas, MATLAB program and signal processing and communication using MATLAB and Simulink blocks, ease of...
