THE BIOCHEMISTRY OF NATURAL PIGMENTS

Cambridge University Press. Paperback. Condition: New. 380 pages. Dimensions: 9.0in. x 6.0in. x 1.0in. In the natural world colour is obvious and its importance in advertising the presence of flowers to pollinators and in camouflage is well known. In most cases the property of colour is due to the presence in the tissues of natural pigments. But these pigments are of much greater importance than merely to give colour, e. g. the fundamental light-harvesting molecules of photosynthesis, the light-detecting molecules of...

Reviews

This publication is worth acquiring. It is actually full of knowledge and wisdom You are going to like the way the blogger publish this book
-- **Prof. Stanley Hermiston**

This pdf is fantastic. It typically is not going to price too much. You will not truly feel monotony at at any time of your own time (that's what catalogs are for about if you request me).
