paperback. Condition: New. Ship out in 2 business day, And Fast shipping, Free Tracking number will be provided after the shipment. Paperback. Pub Date :2012-09-01 Pages: 90 Publisher: Higher Education Press title: the reform of medical education textbook series: medical physics experiment (English) Original Price: 15.00: Liu Zhicheng Press: Higher Education Publishing Date :2012-09-01 ISBN: 9.787.040.355.291 words: Page: 90 Edition: 1 Binding: Folio: 16 Weight: Editor's Summary of The book is written primarily for the first year of pre-medical students. We provide a systematic but brief introduction to the knowledge of measurement data analysis, which includes uncertainty estimation, significant figures and scientific notation. The emphasis of this book is on the training of basic measurements, such as the measurements of length, speed, temperature and voltage, and experimental skills, such as correct recording of data, focusing of a telescope, operation of an oscilloscope, circuit connection, finding the relation between two sets of data, and so on. Although most details necessary on the procedures of the experiments are given, this book can not be used as a substitute for carrying out actual experiments. Besides, it is encouraged that students conduct experiments by themselves and carry out data analysis independently, even if, in some cases...

Reviews

Completely essential study publication. Better than never, though I am quite late in start reading this one. I am very easily could get a delight of reading a composed publication.

-- **Marilyne Macejkovic**

This book might be worthy of a go through, and a lot better than other. It had been written really properly and helpful. You may like just how the author write this publication.

-- **Prof. Mattie Beatty**
